Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 September 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 6,855,310 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-18 are generic to all that is recited in claims of U.S. Patent No. 6,855,310 B2. That is, claims of U.S. Patent No. 6,855,310 B2 fall entirely within the scope of claims 1-18, or in other words, claims 1-18 are anticipated by claims of U.S. Patent No. 6,855,310 B2. Specifically, the compositions and the method of production of instant claims 1-18 are anticipated by the compositions for delivery and the method of production of the reference claims.

Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 6,716,417 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-18 are generic to all that is recited in claims of U.S. Patent No. 6,716,417 B2. That is, claims of U.S. Patent No. 6,716,417 B2 fall entirely within the scope of claims 1-18, or in other words, claims 1-18 are anticipated by claims of U.S. Patent No. 6,716,417 B2. Specifically, the compositions and the method of production of instant claims 1-18 are obvious over the compositions for delivery in claim 1 and the method of production of claim 6 of the reference claims because acetaminophen, orphenadrine and tramadol are also considered anti-inflammatories.

Claims 1-9 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of copending Application No. 10/735,497. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-9 are generic to all that is recited in claims of copending Application No. 10/735,497. That is, claims of copending Application No. 10/735,497 fall entirely within the scope of claims 1-9, or in other words, claims 1-9 are anticipated by claims of copending Application No. 10/735,497. Specifically, the compositions for delivery of instant claims are obvious over the method of administration and the kit comprising the composition recited in copending Application No. 10/735,497.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-9 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 14, 16 and 18-24 of copending Application No. 10/735,199. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-9 are generic to all that is recited in claims of copending Application No. 10/735,199. That is, claims of copending Application No. 10/735,199 fall entirely within the scope of claims 1-9, or in other words, claims 1-9 are anticipated by claims of copending Application No. 10/735,199. Specifically, the compositions for delivery of instant claims are obvious over the method of administration and the kit comprising the composition recited in copending Application No. 10/735,199 because acetaminophen, orphenadrin and tramadol fall entirely within the scope of anti-inflammatory drugs.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-9 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of copending Application No. 10/718,982. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have

been obvious over, the reference claims. Here claims 1-9 are generic to all that is recited in claims of copending Application No. 10/718,982. That is, claims of copending Application No. 10/718,982 fall entirely within the scope of claims 1-9, or in other words, claims 1-9 are anticipated by claims of copending Application No. 10/718,982. Specifically, the method of administration and the kit comprising the composition recited in instant claims 1-9 are anticipated by the compositions for delivering a drug aerosol comprising acetaminophen, orphenadrine and tramadol of copending Application No. 10/718,982.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
